

Benefits of Azure Virtual Desktop to enable your remote workforce

Bring your own device

1

Remote employees can securely access company resources from their own unmanaged devices.

Device cost

2

Run programs inexpensively from your devices, like thin clients, Chromebooks, and NUCs.

Virtualization

3

Reduce unused processing power based on the user's and team's needs.

Whitelisted access

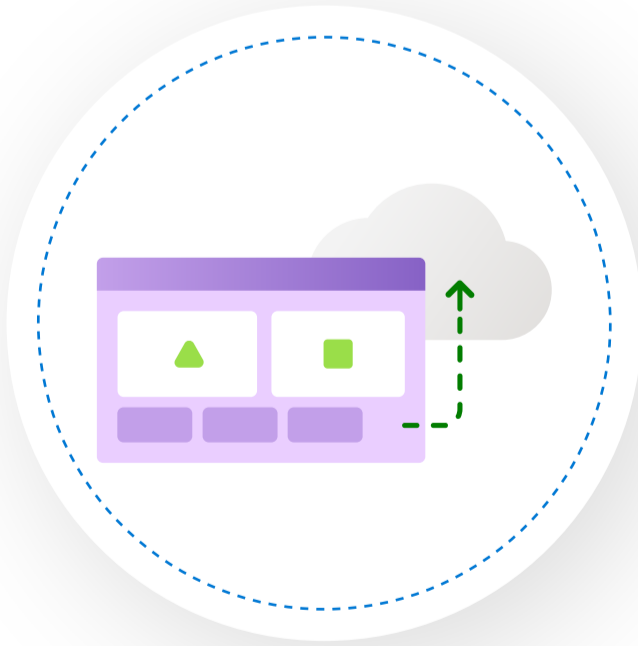

4

Create virtual workspaces securely with Azure Virtual Desktop and Azure NAT Gateway.

No VPN slowdown

5

By migrating to Azure Virtual Desktop, you gain more scalability for crisis events.

Working remotely

6

Azure Virtual Desktop allows you to easily work from home.
